

Info about the research for pupils

Welcome to making research! In this study we look at how children learn English and what they think of it. To get an answer to this study, researchers do research.

Hi! We are researchers Hanna, Otso and Anssi.
We do research at the University of Jyväskylä.

Your parents have given permission for you to participate in this research. The topic of the research is studying English language.

To you this research means that we visit an English lesson. Then we draw pictures together with the class.

After that, Hanna or Otso will talk with you about learning English and do exercises with you in Finnish and in English. If you want to you can stop the interview and exercises.

Privacy and security matters are taken seriously. Your drawing might be published but your name is not shown with it. No one knows that it is you who has drawn that image.

The interview and exercises are recorded with an audio recorder. No one besides Hanna, Otso and Anssi hears the interview.

Finally, Hanna and Otso write a piece of text about the research. The text may include things you have said during the interview, but your name and your school will not be shown.

You cannot be recognized from the study.

Thank you for helping, you are now a science maker!
