RESEARCH NOTIFICATION

1. INTRACOMP Research (Intercultural and Transcultural Competence through Collaborative Cultural Expression) and invitation to participate in research

We ask you to participate in INTRACOMP research (Intercultural and Transcultural Competence through Collaborative Cultural Expression <https://intracomp.info>) that is funded by the European Union, and which aims to promote cultural awareness and expression in education and to enhance the inclusion and competence of children and young people. INTRACOMP particularly focuses on developing intercultural and interdisciplinary skills through arts education.

The INTRACOMP project is a three-year project developing an innovative and practical competence framework (ITC Framework) that supports the intercultural and interdisciplinary skills of individuals, groups, organizations, and systems. This framework helps identify, validate, and support the development of intercultural and transcultural competence in arts education.

The project develops and applies methods that support the use of the arts in education and assess their impacts. The INTRACOMP project will result in action recommendations that support the development of intercultural competence in education and the cultural sector. The ITC Framework developed by the project provides tools and methods to assess and support intercultural competence in various contexts.

The project will develop the following activities:

- **Training Programs and Workshops:** INTRACOMP offers training programs and workshops that support the professional development of arts educators, teachers, and cultural sector professionals.
- **Digital Tools:** The project develops digital platform that supports intercultural interaction and learning.
- **Arts Education Interventions:** INTRACOMP implements arts education interventions at various educational levels and within cultural organizations.
- **Policy Recommendations:** The project formulates policy recommendations that support the development of intercultural competence in education and the cultural sector.

You are asked to join us and contribute your valuable perspectives from the **fields of art, culture, and education**. This study will also explore cultural encounters, providing a rich context for understanding diverse perspectives in the arts. We warmly invite you to participate in this important conversation.

This research notification describes the study and related participation. The privacy notice provides information on the processing of your personal data.

2. Voluntariness

Participation in this study is voluntary. You can refuse to participate in the study, stop participating or cancel your previously given consent, without stating any reason for this and at any time during the study. This will have no negative consequences to you.

If you stop participating in the study or if you cancel your consent, the personal data, samples and other information collected on you up to that point will be used as part of the research material as far as it is necessary in order to ensure relevant research outcomes.

3. Progress of the study

You will take part in a focus group interview. We anticipate that a between 45-120 minutes will be required for any given activity. Detailed information regarding arrangements will be provided by the researcher(s) carrying out the activity. If you agree, you may be invited to other project activities or informed about the project results.

4. Possible benefits from the study

The research process will promote reflection and be an opportunity to provide your opinion on an important topic. The collected and analysed evidence would support the development of an innovative and practical competence framework (ITC Framework) that supports the intercultural and interdisciplinary skills of individuals, groups, organizations, and systems.

5. Possible risks, harm, and inconvenience caused by the study as well as preparing for these

There are no significant risks or disadvantages from taking part.

6. Study-related costs and compensations to the subject as well as research funding

No rewards will be paid for participation in the study.

7. Informing about research results and research outcomes

INTRACOMP will publish its results in a wide range of formats (e.g., reports, conference presentations, academic articles, promotional materials), but no personal data collected will be publicly available. INTRACOMP will provide open access to all its publications via the INTRACOMP website (<https://intracomp.info>) and trusted academic repositories. We expect that these will be useful for teachers, practitioners and policymakers at all levels of the education and training process.

8. Insurance coverage for research subjects

The University of Jyväskylä has insurances for its activities and research subjects.

In the case of research conducted remotely, the insurance of the University of Jyväskylä compensates only for damage that is directly related to the assigned research task and that has occurred during the actual guided research task. The insurance does not cover accidents that occur during breaks.

The insurances of the University of Jyväskylä are not valid in the case of research conducted remotely if a research subject's home municipality is not in Finland.

The set of insurance includes a malpractice insurance, an operational liability insurance, and an optional insurance against accidents. During the research activities, the subjects are covered by the insurance for accidents, damages and injuries inflicted by an external cause. The accident insurance is valid during measurements and on trips integrally connected to them.

Processor(s) of personal data

Processor of personal data refers to somebody processing personal data on behalf of the Data Controller and according to the Data Controller's instructions. A Data Processing Agreement must be signed with the processor of personal data. In this research, personal data are processed by: Atlas.TI.

During research, the Data Controller can also use other processors of personal data who cannot be named beforehand. Necessary agreements are always signed with the processors and their eligibility for the processing of personal data in terms of information security is assessed before signing the agreement. The data subject will be informed separately about the use of another processor if the change is significant from the data subject's point of view.

To ensure the accuracy of research data, the Data Controller may submit data for processing (primarily without direct identification data) to a so-called research reviewer or verifier for a defined period when necessary. These reviewers or verifiers work under the supervision of research staff, and data processing agreements are signed with them.

2. Other disclosure of personal data during research

Your data will be handled confidentially and without disclosing them to any outsiders.

3. Personal data to be processed in [add the name of the study]

Your personal data will be processed for the research purpose described in the information letter.

In this research, we will collect the following personal data on you **including name, gender, nationality, organisation, title, degree, email address, video records, and interview notes**. Data collection is based on the research plan.

This research does not involve the processing of personal data of special categories.

This privacy notice is published on the website of the study and data subjects have received an electronic questionnaire including a direct link to this information.

4. The lawful basis for processing personal data in scientific research

☒ Scientific research serving a public interest (GDPR, Article 6.1e, special personal data categories 9.2j)

5. Transfer of personal data outside the EU/EEA area

In this research, your personal data will not be transferred outside the EU/EEA area.

6. Protection for personal data

Processing of personal data in this research is based on an appropriate research plan and the study has a designated person in charge. The personal data collected and saved for this research will include only such data that is necessary for the research purpose.

Preventing identification

☒ As a protective measure, any direct identification data are removed upon the compilation of the data set (pseudonymised data allowing restored identification using codes or equivalent information, and also new data connected to the data set).

The personal data processed in this research will be protected using:

☒ user ID ☒ password

For this study, a separate data protection impact assessment has been made **[READ INSTRUCTION: Risk assessment i.e. impact assessment for data protection— University of Jyväskylä (jyu.fi). An initial analysis is always necessary.]**

☒ Yes ☐ No, because the researcher in charge has checked that the impact assessment is not compulsory.

The researchers have completed data protection and information security training

☒ Yes

Agreements with research assistants and/or processors of personal data /Joint Data Controllers

☒ Yes

7. PROCESSING OF PERSONAL DATA AFTER THE RESEARCH HAS ENDED

☒ The research register will be anonymised after the study has ended, approximately by July 2028. This means that all identification data are fully removed so that there will be no return to the identifiable personal data, nor any new data can be connected to this data set or

8. Rights of the data subject

Cancellation of consent (GDPR, Article 7)

You have the right to cancel your consent if the processing of personal data is based on consent. Such a cancellation has no impact on the lawfulness of consent-based processing conducted before the cancellation of consent.

Right to access your personal data (GDPR, Article 15)

You have the right to get to know whether and which personal data of yours are processed. If you wish, you can also request a copy of your personal data to be processed.

Right to rectification (GDPR, Article 16)

If there are any inaccuracies or errors in your personal data to be processed, you are entitled to request that these be rectified or supplemented.

Right to erasure (GDPR, Article 17)

You have the right to demand in some cases that your personal data be erased. However, the right of erasure is not applicable if the erasure would prevent or greatly hinder reaching the goal of processing in scientific research.

Right to restriction of processing (GDPR, Article 18)

You have the right to restrict the processing of your personal data in some cases, like when you challenge the correctness of your personal data.

Right to data portability (GDPR, Article 20)

You have the right to receive your submitted personal data in an organised, generally used, and machine-readable format, and also the right to transfer the data to another Data Controller if possible and processing takes place automatically.

Deviating from the rights

In some individual cases, it is possible to deviate from the described rights on the grounds stipulated in the GDPR and the Data Protection Act insofar as the rights would prevent or greatly hinder reaching the goals of scientific or historical research or statistical purposes. The need for deviating from the rights is always assessed case-specifically. It is also possible to deviate from the rights if the data subject cannot, or cannot any longer, be identified.

Profiling and automatised decision-making

In this research, your personal data will not be used for any automatic decision-making. In this research, the purpose of the processing of personal data is not to assess your personal qualities, i.e. profiling, but personal data and qualities are considered from the perspective of broader scientific research.

Implementing the data subject rights

If you have any questions about your data subject rights, you can contact the University's Data Protection Officer. All requests concerning the implementation of data subject rights are submitted to the JYU Registry Office. Registry Office and Archives, P.O. Box 35 (C), 40014 University of Jyväskylä, tel. 040 805 3472, email: kirjaamo@jyu.fi. Visiting address: Seminaarinkatu 15, Building C (University Main Building, 1st floor), Room C 140.

Additionally, the Contact person at Nord for any questions related processing personal data is Prof. Nicholas Rowe, Nord University, Faculty of Education and Arts, Høgskoleveien 27, 7600 Levanger (Norway), nicholas.rowe@nord.no / n.rowe@auckland.ac.nz

The organisations listed in Section 1 act as Joint Data Controllers in this research, so that they are jointly responsible for the lawful processing of personal data. Data subjects can make all requests regarding the use of data subject rights in this research to the following contact person: Terhi Nokkala

A data subject can use his or her data subject rights under the GDPR with relation to, and against each Data Controller. In such a case, the recipient will forward the request or demand also to the other Joint Data Controllers.

Reporting an actual or suspected information security breach to JYU
<https://help.jyu.fi/jp>

You have to lodge a complaint with a supervisory authority, especially with a locally relevant one in terms of your permanent place of residence or work if you regard that the processing of personal data violates the EU General Data Protection Regulation (EU) 2016/679. In Finland, the supervisory authority is the Data Protection Ombudsman.

Updated contact information of the Office of Data Protection Ombudsman: <https://tietosuoja.fi/etusivu>
