You will find the seminars on Zoom:

This book provides a comprehensive overview and in-depth coverage of contemporary aspects of leadership in the field of education. It brings together scholars to explore critically and discuss leadership in education in the Finnish education system in relation to international discourses around the topic. The aim is to unravel the nature of the Finnish approach to educational leadership regarding theory and practice and to discuss the theme in various educational contexts.

In this online seminar series the authors give the presentations based on their chapters and together we discuss these contents and messages in them.
